

MODULAR OFFICE SYSTEM

Create and modify your office environment with our flexible, fast and cost effective modular building components

- Sleek, sturdy construction easily customized to your design needs
- Components for walls, cubicles, privacy pods & rooms, shelving, tables, storage, interactive & display units and more
- Simple disassembly, moving and storage for your convenience

There's a new way to get your office ready for business, quickly and easily!

Create your office workspace in real time with the most innovative modular system available – Emagispace. Through its patented EmagiBlock® building components, Emagispace has everything you need to create and customize the right office solution, wherever and whenever. Set up office spaces in a fraction of the time, cost and effort of traditional builds. Rapidly reconfigure, redesign, and reconstruct your space for responsiveness.

Emagispace offers you unmatched flexibility whatever your needs. Quickly mobilize to keep pace with employee and business needs. Develop new personal workspaces, divide existing spaces, enhance functionality, and expand areas for larger groups. Whatever you imagine or need, we help you make it real!

Emagispace MODULAR OFFICE SYSTEM

Powered by patented EmagiBlocks® made of sustainable fiberboard panels and ABS interlocking blocks that connect to fit any space or scale

One size never fits all, you need maximum freedom of choice to turn your vision into reality. Our modular, kitted products offer quick, ready-to-order components and finishes, along with ultimate flexibility in configuration, custom branding and add on features.

The right configuration and components

- Flexible, scalable kits and components that can be configured and combined into virtually endless variations, conforming to every twist and turn of your space plan.
- Product design and engineering experts available to assist you with design plan technology and ideation to develop the right layout and components to your specifications.
- Open-source design compatible with add-on features or fixtures including walls, doors, video displays, merchandising racks, interactive and POS technology, plumbing and electrical.
